

MEMORANDUM OF UNDERSTANDING

This MEMORANDUM OF UNDERSTANDING (this "MOU") is made and entered into on this **16th day of June, 2025**,

BY AND BETWEEN:

1. **LaxmanDeep Financial Services Private Limited**,
(CIN: U70200AP2024PTC113671), a company duly incorporated under the laws of India, having its registered office at D No: 1/18 D. Gollapalli, Vontimitta, Kadapa, in Andhra Pradesh, India – 516213 represented through its CEO & Chairman Mr. Lakshumaiah Nanubala (Passport No. Y8914671) (hereinafter referred to as "LaxmanDeep")

AND

2. **SWISS CAPITAL GROUP BANCAVERSE GEM DIGITAL FINANCIAL HOLDING LTD.** (Company No. 12144), an International Company incorporated/formed under the International Companies act 1988, having its principal place of business at 2 Route de Suisse, 1296, 8001 Coppet, Switzerland represented through HRH Datu Grand Prince of Orients Dr. Gary SUM (Passport No. HJ2068388) (hereinafter referred to as "Swiss Capital Group").

(LaxmanDeep and Swiss Capital Group are hereinafter collectively referred to as the "Parties" and individually as a "Party".)

WHEREAS:

- A. LaxmanDeep possesses expertise in financial services and a strong understanding of the Indian market, particularly in integrating cryptocurrency into financial systems.
- B. Swiss Capital Group is an international fintech entity with global market access and strategic capabilities in financial and digital transformation.
- C. The Parties desire to explore and establish a collaborative framework for a joint project (the "Project") aimed at integrating cryptocurrency frameworks and launching blockchain-based financial services in India.
- D. This MOU sets forth the general understanding and preliminary agreement between the Parties regarding the Project, serving as a non-binding declaration of their mutual intent to proceed with further discussions and definitive agreements.

NOW, THEREFORE, THE PARTIES HEREBY MUTUALLY AGREE AS FOLLOWS:

1. OBJECTIVE OF COLLABORATION

The primary objective of this collaboration is to jointly develop and launch blockchain-based financial services in India, including the integration of cryptocurrency frameworks aligned with BRICS financial structures. This will involve the creation of a new, dedicated entity in India.

2. SCOPE OF MUTUAL AGREEMENT

- a) **Formation of a New Entity:** The Parties mutually agree to explore the formation of a new private limited company in India with the preferred name **“Swiss Capital Group Bancaverse SCGAI Cryptoport NDBC Indo-Pacific LaxmanDeep AI Web3 Fintech BanCorp Limited”** (the "JV Company") which is subject to the approval of the respective Regulatory Authority, as the primary vehicle for undertaking the Project.
- b) **Intended Equity Arrangement:** The Parties intend that the equity shareholding in the JV Company will be allocated such that Swiss Capital Group holds approximately seventy-five percent (75%) and LaxmanDeep holds approximately twenty-five percent (25%). The final equity split, including share classes and specific rights, shall be determined in a separate, definitive shareholders' agreement.
- c) **Preliminary Roles and Contributions:**
Swiss Capital Group's Intended Contribution: Swiss Capital Group is expected to contribute strategic direction, financial resources, and global market access for the Project.
LaxmanDeep's Intended Contribution: LaxmanDeep is expected to contribute operational expertise, local market knowledge, and technical development/support for the Project in India.
- d) **Key Personnel Nomination (Intent):** Subject to Swiss Capital Group meeting certain financial obligations to be defined in the definitive agreements, the Parties intend to nominate key personnel for the JV Company's management, with a preliminary understanding that Dr. Gary Sum (or Swiss Capital Group's nominee) would serve as Chairman and CEO, and Mr. Lakshumaiah Nanubala (or LaxmanDeep's nominee) would serve as Vice Chairman & Managing Director. The specific roles and compensation arrangements will be formalized in definitive agreements.

- e) SCGAI: Permission is granted for the India JV Company to engage in the Swiss Capital Group Generative AI (SCGAI) \$100B Ecosystem that is at the forefront of disruptive innovation, integrating Generative AI (GAI) with blockchain technology to create a next-generation, AI-powered financial platform. SCGAI's mission is to revolutionize the global financial landscape by delivering AI-driven financial solutions, asset tokenization, and decentralized lending—all within a secure and robust ecosystem.

At the heart of this ecosystem is the SCGAI token, the cornerstone utility and governance instrument powering every facet of the platform. It enables AI-enhanced lending, crypto-backed loans, real estate and hard asset tokenization, and cross-border payments. With strategic acquisitions of ISO20022-compliant tokens and the introduction of gold-backed stablecoins, SCGAI positions itself as a leader in both decentralized finance (DeFi) and AI-enhanced markets.

Furthermore, the SCGAI Cryptoport ecosystem will comprise investments inaugurating the SC Generative AI Research Lab, Web3 high-performance data centers, Smart City Technology and Development, Sustainable Private Equity and Debt Financing Schemes, SCGAI Supercomputing Centre, and the Swiss Capital Digital Stock Exchange.

f) List of Projects for Solution Development and Implementation

1. Qmasters And Fortress Cyber
2. WibioCard
3. The World Intelligence Agency (WIA)

1. Qmasters and Fortress Cyber

Scope:

Cybersecurity distribution involves reselling or distributing cybersecurity products and services (e.g., software, managed security services, or network appliances) to businesses, often through channel partners like Managed Service Providers (MSPs) or Value-Added Resellers (VARs). Marketing in this space requires building trust, demonstrating expertise, and targeting decision-makers like CISOs, IT managers, and business leaders in a highly competitive and technical market.

Business development for a cybersecurity distribution business involves identifying opportunities, building partnerships, and generating leads through targeted strategies. Below are specific strategies and content ideas to drive growth.

- **Value Proposition:**
 - Offer a portfolio of high-demand cybersecurity solutions (e.g., endpoint protection, firewalls, MDR) from vendors like CrowdStrike, Fortinet, and Sophos. Emphasize ease of deployment, affordability for SMBs, and scalability for enterprises.
 - Provide value-added services like vCISO programs, security audits, and compliance consulting (e.g., GDPR, HIPAA) to differentiate from competitors.
- **Lead Generation Strategies:**
 - **Educational Webinars:** Host webinars titled “Protecting Your SMB from Ransomware in 2025” featuring Sophos MDR or CrowdStrike Falcon Go. Showcase real-world case studies (e.g., Sophos stopping 600% more breaches during the pandemic). Promote via LinkedIn and email campaigns.
 - **Free Security Assessments:** Offer free vulnerability scans or risk assessments using tools like CISA’s Cyber Security Evaluation Tool (CSET). Follow up with tailored solution proposals.

Product Details and the Features (Qmasters, Fortress Cyber)

Qmasters and Fortress Cyber form a unique Products.

Qmasters: Focuses on product development and innovation.

Fortress Cyber: delivers specialized services and implementation support.

Qmasters:

Secure your business with comprehensive, custom-tailored cyber security strategies and technologies led by leadership with expertise in consulting, implementation, integration, and professional cyber security services.

(Elevating Cybersecurity Standards Locally and Globally)

Qmasters provides best-of-breed security technologies combined with professional delivery services that set a new standard in the cybersecurity industry. Our approach goes beyond product implementation—we deliver end-to-end cybersecurity solutions that include expert consulting, adherence to industry best practices, and tailored deployments designed to meet each client’s unique requirements.

We have strategically positioned QMasters as a market leader in full-spectrum cyber solution delivery, offering a comprehensive service stack from risk assessment to solution integration. Our solutions empower clients to proactively mitigate threats, comply with industry regulations, and optimize security posture across their operations.

Innovation is at the core of our identity. Qmasters represents top-tier standards of cybersecurity, serving over 300 prominent medium- and enterprise-sized clients, including national defense organizations, financial institutions, healthcare providers, insurance companies, and government agencies. Our reputation for reliability and expertise has enabled us to become a trusted name in the information security space—both locally and internationally.

At Qmasters, we do not believe in one-size-fits-all. We deliver customized solutions based on world-class technologies and practices that have been personally tested and validated by our expert teams. Our goal is to help clients efficiently manage threats while maximizing operational value.

Areas of Expertise

Expert Cyber Security Consulting

Takes a comprehensive and holistic view to understand your unique technology environment and develop strategies, solutions and techniques to meet the ever-changing threats of the modern world.

Custom Development of Security capabilities & Automation

We develop connector & custom applications for security platforms (i.e. IBM® QRadar®, Cortex®), deliver custom SOAR integrations and execute development projects with a strong cyber security orientation.

Customized Cyber Integration

Design, architect, plan and implement affordable, robust and hardened information security systems and solutions, with the best technologies, to meet your exact requirements

Technology Implementation

We install cyber security solutions optimized to your business needs and security requirements to ensure business resilience.

MCSS – Managed Cyber Security Services

Services designed to protect organizations of all sizes from data breaches, reduce attacker dwell time, and negate the impact of any malicious activity on your business operations. To make this happen, we collect the right data at the right time – with no compromises.

Fortress Cyber

Fortress Cyber: typically refers to a cybersecurity company or framework that emphasizes **comprehensive, defense-in-depth protection**—just like a fortress protects a stronghold.

Fortress Cyber provides specialized cybersecurity services across the following core industry domains.

- a) Defense & Military
- b) Finance & Banking
- c) Healthcare & Insurance
- d) Government & Critical Infrastructure
- e) Large Enterprises and High-Security SMEs

While the exact details depend on the specific company named **“Fortress Cyber,”** such a name implies the following core functions and value propositions:

What Fortress Cyber Will Do:

1. End-to-End Cybersecurity Solutions

- Deliver complete security coverage from network edge to core infrastructure
- Include risk assessments, audits, penetration testing, and remediation

2. Threat Detection & Response (MDR/XDR)

- Use AI-powered platforms to detect, analyze, and neutralize cyber threats in real time
- Offer Managed Detection & Response (MDR) or Extended Detection & Response (XDR) services

3. Security Operations Centre (SOC)

- Operate 24/7 SOC-as-a-Service to monitor, detect, and act on threats
- Include incident response playbooks and escalation procedures

4. Zero Trust Architecture Implementation

- Design and deploy Zero Trust Networks, ensuring identity and access verification at every level

5. Compliance & Governance

- Help clients meet regulatory frameworks like GDPR, HIPAA, NIST, PCI-DSS, ISO 27001
- Deliver GRC dashboards and audit trails

6. Cyber Resilience & Backup Solutions

- Build data resilience through secure backups, disaster recovery, and ransomware protection

7. Cloud & Endpoint Security

- Secure multi-cloud environments, SaaS apps, and remote workforce endpoints

8. Security Awareness & Training

- Conduct employee training programs and phishing simulations to reduce human error

Expanding for Global Readiness

To further position Qmasters as a globally recognised cybersecurity provider, we are now focusing on enhancing our core product to include additional features that support standardisation and international implementation. This evolution is essential for:

- Supporting domestic and international deployments
- Ensuring compliance with regional and industry-specific security policies
- Achieving cross-zone compatibility for diverse regulatory environments
- Addressing constraints currently experienced by enterprise-sized clients across sectors

These enhancements will enable Qmasters to scale our offerings seamlessly across multiple domains—including finance, healthcare, defence, government, and critical infrastructure—without compromising on security, performance, or regulatory alignment.

As part of this roadmap, we are also focused on building modular, policy-driven architectures that can adapt dynamically to the evolving threat landscape and regional governance models.

Qmasters and Fortress Cyber are more than just cybersecurity vendors—we are strategic partners, dedicated to delivering innovation, building trust, and upholding excellence at every step.

At Qmasters and Fortress Cyber, we transcend traditional cybersecurity roles—serving as trusted strategic partners committed to innovation, operational reliability, and excellence in every engagement.

2. WIBIOCARD

About WiBioCard:

At WiBioCard, we are on a mission to redefine access control and identity verification. Unlock a new level of security, privacy, and convenience for physical and logical access through password-less biometric authentication. With WiBioCard, take control of your digital identity, protect your sensitive data, and enjoy seamless integration. Experience security, simplicity, and sustainability in one elegant solution.

Problem

How can you be 100% sure that the cardholder is also the owner??

Solution

WiBioCard offers cards with Integrated Biometric Sensors which can guarantee through a Matching Codified Algorithm (performed on the card itself), certain an immediate identification of the subject.

Benefits

- High Security Level and perception
- Allow for Significant money savings
- Green impact on the society and the environment
- Privacy compliant • Hygienic with no touch interaction while reading it

Products and Services

- Wibio-Smart Lite
- Wibio-Smart Secure Display
- Wibio-Smart Secure
- Wibio-Online Security
- VPN biometric authentication solution
- iVoting biometric authentication solution
- Multi-factor authentication (MFA) solution
- Digital Asset Custody Infrastructure for crypto markets

Features

1. WIBIOCARD IN A NUTSHELL
2. PRODUCTS AND SERVICES
3. MARKETS OUTLET
4. PARTNERSHIP
5. BUSINESS MODEL
6. PATENTS

VPN biometric authentication solution

VPN Bio Access is a refined vertical application incorporated into a Virtual Private Network (VPN) service. It leverages WiBioCard's cutting-edge "strong authentication" solution to elevate the security and accessibility of your company's remote services. Here are the standout features when incorporating the WiBioCard biometric card as a means of authentication:

1. **Enhanced Security:** The integration of WiBioCard's biometric card ensures that only authorized personnel can access the network. The biometric verification serves as an added layer of security, making it almost impossible for unauthorized users to gain access.
2. **User-Friendly Experience:** By using biometric authentication, users are freed from the hassles of remembering complex passwords, leading to a seamless and frictionless login experience.
3. **Reduced Vulnerabilities:** Traditional password-based systems are susceptible to breaches, phishing, and other cyber-attacks. With biometric authentication, these risks are significantly diminished.
4. **Scalability:** The WiBioCard solution can easily be scaled to accommodate an increasing number of users, making it suitable for businesses of all sizes.
5. **Compliance:** Incorporating biometric authentication can help businesses align with various data protection and cybersecurity regulations, ensuring a compliant remote access solution.
6. **Anytime Anywhere Any Device Access:** The integration of the WiBioCard into the VPN service ensures that employees can securely access company resources from any device, at any time, and from anywhere, without compromising on security.

In essence, VPN Bio Access, powered by WiBioCard's biometric card, presents a paradigm shift in how VPN services are securely and conveniently accessed, offering businesses a formidable blend of security and ease-of-use.

Partnerships

- ❖ Main Supply Source of Hardware and Components
 - Strategic shareholder and partnership agreement signed with CardLab and Partitalia
- ❖ Secondary Supply Source of Hardware and Components
 - Agreement with Selp, HID Global, Techboard Group, Ambiq, E-connexion, OctoLab
- ❖ Strategic Software Partnership with multinational Betacom Group and Nexid for software development and application management
- ❖ Strategic Software Partnership with Futuræ (MFA product vendor) and Vautavo (Digital Asset Custody infrastructure for crypto wallet)

Business Model

Strategic agreement with CardLab for the manufacturing of WiBioCard cards (CardLab is a shareholder of WiBioCard)

Joint R&D team of CardLab and WiBioCard for the definition of the project specifications

Patents are WiBioCard property

Software provided by Betacom and Nexid's WiBioCard shareholders

Variety of Software and Hardware products

Strategic partnership with best of breed of the market

Future Product Innovation -Roadmap

Future product innovation ideas for WiBioCard—a product that (assuming from the name) combines **wireless, biometric, and smart card** technologies. If this is a smart ID or authentication device, it's positioned for exciting use cases across identity, access, health, and fintech.

Future Product Innovations for WiBioCard

1. Multi-Factor Biometric Authentication

- **Integrate multiple biometric methods** (fingerprint, iris, voice) on one card.
- Add **touchless recognition** (palm vein, facial proximity sensor) for hygiene and convenience.

2. Health Data Integration

- Turn the card into a **portable health profile**:
 - Store **vaccination certificates**, allergies, chronic condition tags
 - Integrate with **wearable health devices** (smart rings, BP monitors) via BLE

- Add emergency mode: A responder can tap the card to access critical health info.

3. Contactless Payments & Identity Verification

- Enable **NFC-based transactions** linked to digital wallets.
- Integrate **Know Your Customer (KYC)** verification that dynamically syncs with government databases.

4. Blockchain-Enabled Identity

- Use blockchain to make the identity **decentralized and tamper-proof**.
- Allow cross-border use without central validation (useful for immigration, banking, education).

5. Geofenced Access Control

- Enable **location-aware access** (e.g., building doors unlock only in approved zones).
- Apply to **multi-zone enterprises**, military, and campus security.

6. Smart Contract Triggers

- Use the card to **trigger events or approvals**:
 - E.g., approve access, start machinery, verify medication delivery via smart contracts.

7. Secure Remote Access

- Let users use WiBioCard as a **hardware security token** for logging into systems (like a FIDO2 device).
- Ideal for remote workers, developers, and field agents.

Innovation Enablers

- **AI** for continuous biometric learning (adapt to user aging or injuries)
- **Cloud sync** for backup, revocation, and updates
- **Military-grade encryption** for all stored/transmitted data
- **Customizable firmware** for vertical-specific use cases (e.g., healthcare vs. banking)

Use Case Expansion

Industry	Innovation Focus
Healthcare	Biometric health ID + portable medical record
Banking & Finance	KYC + payment + digital identity wallet
Government & Border	Biometric passport / visa card
Education	Student ID + library + attendance tracker
Corporate Security	Physical + digital access control
Defense	Encrypted ID + geofenced mission access

WiBioCard Product Development Roadmap

Phase 1: Foundation & Core Identity (Q1–Q2)

Objective - Launch a secure, biometric-enabled smart ID card with basic functionality.

Key Features

- Biometric (fingerprint) authentication
- Secure NFC contactless communication
- Identity verification (government & enterprise)
- Encrypted data storage on card
- Card issuance platform (admin tool)

Use Cases

- Employee access badge
- Student/enterprise ID
- Health ID prototype

Phase 2: Advanced Authentication & Integration (Q3–Q4)

Objective - Expand card capabilities to include more use cases & security enhancements.

Additions:

- Multi-biometric support (voice or iris)
- Digital signature & document verification
- API integrations with third-party platforms (e.g., hospital or bank systems)
- Cloud dashboard for revocation, updates, and access logs
- Support for digital KYC workflows

Use Cases:

- Hospitals, banks, and telecom for onboarding
- Cross-platform authentication

Phase 3: Financial & Health Services Integration (Q1 Next Year)

Objective: Expand into fintech and medtech verticals.

Features:

- Contactless payments (NFC / QR)
- Wallet integration (UPI, Apple Pay, Google Pay)
- Secure storage of health data (allergies, conditions, prescriptions)
- Emergency access layer (tap card → emergency data)

Use Cases:

- Healthcare ID with critical data
- Wallet card for underbanked markets
- Insurance-linked smart health ID

Phase 4: Cross-Border, Blockchain & Decentralized Identity (Q2–Q3)

Objective: Position WiBioCard as a **global digital identity platform**.

Innovations:

- Blockchain-based decentralized identity (DID)
- Cross-border identity verification
- Compliance with GDPR, HIPAA, ISO 27001
- Smart contract triggers (automated approvals)
- Geo-fenced authentication zones

Use Cases:

- Immigration & border control
- Defense & security zones
- Government ID replacement (passport, visa, etc.)

Phase 5: AI & Predictive Security (Q4+)

Objective: Make WiBioCard intelligent and adaptive.

Features:

- AI-driven threat detection (flag anomalies in usage patterns)
- Continuous authentication via ambient biometrics
- AI-based user behaviour modelling (adaptive access control)
- Self-healing card OS and firmware updates

Use Cases:

- High-security operations (military, banking, data centers)
- Executive or VIP protection

Final Notes

- This roadmap supports a **modular release strategy**—early adopters can onboard with basic features, and upgrade progressively.
- Each phase is aligned to unlock **new revenue streams** and **expand market reach**.

3. The World Intelligence Agency (WIA)

INTRODUCTION TO WORLD INTELLIGENCE AGENCY (WIA)

The World Intelligence Agency (WIA) is a cutting-edge intelligence organization dedicated to global security, economic intelligence, and technological innovation. Positioned at the forefront of intelligence gathering, counterintelligence, and cybersecurity, WIA operates as a trusted partner for governments, multinational corporations, financial institutions, and international organizations.

Our mission is to anticipate emerging threats, provide actionable intelligence, and drive strategic decision making in an increasingly complex world. Leveraging AI-driven analytics, predictive intelligence, and next generation surveillance technologies, WIA delivers unparalleled insights into geopolitical risks, cyber threats, and economic trends.

At WIA, we believe in a customer-centric intelligence model, where our tailored solutions empower clients to stay ahead of global uncertainties, mitigate risks, and enhance security resilience. Through strategic partnerships with top technology firms, defense agencies, and financial leaders, WIA is shaping the future of intelligence by integrating advanced cybersecurity frameworks, AI-powered risk assessments, and encrypted intelligence networks.

With a clear roadmap for growth, innovation, and strategic impact, WIA is on a mission to become the world's leading intelligence powerhouse—bridging the gap between security, technology, and global stability.

GLOBAL INTELLIGENCE STRATEGY (GIS)

The World Intelligence Agency stands ready to confront challenges and capitalize on emerging opportunities with confidence, innovation, and commitment. Our intelligence community is committed to safeguarding international interests and ensuring that nations and global institutions remain prepared for both immediate and long-term threats. The agency conducts strategic assessments through a fully integrated approach, aligning intelligence resources with strategic objectives to maintain a proactive stance in global affairs.

Aligned with the Global Security Framework 2025, the GIS establishes how the WIA will contribute to strengthening and securing vital global interests—protecting people, fostering economic growth, and upholding the principles of transparency, sovereignty, and stability.

To effectively address challenges and seize opportunities, the GIS for 2026 prioritizes:

- ❖ Securing global stability by addressing multifaceted threats, including cybersecurity, economic espionage, and emerging digital warfare.
- ❖ Preventing and mitigating strategic disruptions to international security through advanced intelligence gathering and counterintelligence efforts.
- ❖ Strengthening alliances and partnerships to deter aggression and enhance cooperative security initiatives worldwide.
- ❖ Enhancing resilience through a robust intelligence network and technological innovation to adapt to evolving security landscapes.
- ❖ The World Intelligence Agency remains steadfast in its mission to anticipate global threats, safeguard international stability, and ensure a secure future through strategic intelligence and collaborative global efforts.

SCOPE, RESOURCES, AND FUNCTIONS

The World Intelligence Agency (WIA) will operate at the forefront of cybersecurity and global intelligence, ensuring digital security, economic resilience, and geopolitical stability. As cyber threats become more sophisticated, WIA's mission is to safeguard critical infrastructure, mitigate cyber warfare risks, and enhance intelligence capabilities across digital landscapes.

Scope WIA's operational domain spans:

- ❖ Cybersecurity & Digital Warfare: Defending against cyberattacks, digital espionage, and emerging cyber threats.
- ❖ Threat Intelligence & Risk Analysis: Identifying and mitigating security risks to critical information systems.
- ❖ Economic & Technological Security: Protecting sensitive economic data, intellectual property, and national assets.

- ❖ Counterintelligence & Espionage Prevention: Preventing unauthorized access to classified intelligence.
- Strategic Partnerships & Global Alliances: Collaborating with international agencies to strengthen collective cybersecurity efforts.

Note: By maintaining a proactive, adaptive, and intelligence-driven approach, WIA plays a pivotal role in securing the global digital landscape and ensuring long-term cybersecurity resilience.

Resources

WIA deploys a highly skilled workforce and advanced technological assets, including:

- ❖ Cybersecurity Experts & Intelligence Analysts specialized in threat detection, digital forensics, and AI-driven intelligence gathering.
- ❖ Advanced Cyber Defense Infrastructure, integrating AI, blockchain security, and real-time threat detection.
- ❖ Global Intelligence Networks ensuring swift data sharing and coordinated responses.
- ❖ Collaborative Operations Centers, working alongside military, governmental, and private sector partners to enhance cyber resilience.

Functions

WIA operates across multiple intelligence and security functions, including:

- ❖ Cyber Threat Prevention & Response: Detecting, neutralizing, and mitigating cyber threats in real-time.
- ❖ Global Digital Surveillance & Intelligence Gathering: Monitoring cyberspace for security vulnerabilities and potential attacks.
- ❖ Incident Response & Crisis Management: Coordinating rapid response strategies for cyberattacks and digital disruptions.
- ❖ Security Policy Development & Compliance: Establishing cybersecurity frameworks aligned with global security standards.
- ❖ Strategic Counterintelligence Operations: Identifying and preventing foreign intelligence threats in cyberspace.

STRATEGIC PRIORITIES FOR WIA (2026 AND BEYOND)

Strategic Priorities for WIA Mission: Strengthening global intelligence, counterintelligence, and security alliances while driving economic growth through technological innovation.

Priority 1: Enhance Global Intelligence & Decision Superiority.

- ❖ Deliver real-time, data-driven intelligence to provide customers (governments, businesses, and allied agencies) with a decision advantage.
- ❖ Develop AI-powered threat detection and predictive analytics to anticipate and mitigate emerging global risks.
- ❖ Strengthen cross-border intelligence-sharing agreements to enhance global security and counterintelligence efforts.

Priority 2: Advance Security & Counter intelligence Capabilities

- ❖ Invest in cutting-edge AI, blockchain, and cybersecurity to secure intelligence operations.
- ❖ Develop an interoperable digital intelligence eco-system to integrate insights across agencies and partners.
- ❖ Accelerate technology adoption in cyber defense, surveillance, and information warfare.

Priority 3: Build Technological Dominance & Innovation

- ❖ Establish a proactive counterintelligence framework to protect customers from cyber threats, espionage, and geopolitical risks.
- ❖ Enhance digital and physical security infrastructure to safeguard sensitive intelligence assets.
- ❖ Train and equip global stakeholders with best-in-class security methodologies.

Priority 4: Strengthen Customer Engagement & Trust

- ❖ Ensure intelligence transparency while maintaining operational secrecy to build trust with stakeholders.
- ❖ Expand partnerships with private sector, academia, and global think tanks to foster innovation.
- ❖ Personalize intelligence solutions for customers based on specific geopolitical, economic, and security needs.

Priority 5: Foster a Resilient & Agile Intelligence Workforce

- ❖ Attract, train, and retain top intelligence professionals with a focus on diversity and expertise.
- ❖ Promote ethical intelligence practices to maintain public trust and global credibility.
- ❖ Cultivate a culture of continuous learning and adaptability to stay ahead of evolving threats.

WORLD INTELLIGENCE AGENCY (WIA) 5-YEAR STRATEGIC ROADMAP

This five-year plan lays out a structured roadmap for WIA, starting with its formation in 2025, followed by expansion, technological advancements, and global influence. The plan ensures WIA’s long-term sustainability, intelligence leadership, and customer-centric growth.

Strategic Insights: WIA (World Intelligence Agency)

1. Mission & Vision

The WIA would serve as a global intelligence coalition, unifying international efforts to:

- Detect, prevent, and neutralize global threats (cyber, terror, biosecurity, geopolitical instability)
- Share intelligence across allied nations in real time
- Operate as a neutral and tech-forward agency transcending national silos

Insight: Its existence would mark a shift from *state-level secrecy* to *coalition-based intelligence models*, increasing transparency, speed, and data symmetry across global allies.

2. Core Capabilities

A modern WIA would likely operate across multiple intelligence domains:

Domain	Capabilities
Cyber Intelligence	Zero-day threat detection, AI-driven threat hunting, global cyberattack attribution
Signals Intelligence (SIGINT)	Satellite surveillance, encrypted comms decryption, global signal interception
Human Intelligence (HUMINT)	Agent recruitment, insider surveillance, regional threat insights
Open-Source Intelligence (OSINT)	Real-time monitoring of social media, deep/dark web, public data mining
AI/ML Intelligence	Predictive modelling, behavioural threat analysis, synthetic data simulations

3. Technology Stack

WIA would likely be built on a **secure, AI-driven, decentralized infrastructure**, featuring:

S No	Technology Stack
1	Quantum-safe encryption
2	Blockchain for data traceability
3	AI agents for behaviour prediction and decision support
4	Neural threat networks (adaptive threat mapping)
5	Secure multi-cloud environments with sovereign node control
6	Insight: Such an agency could pioneer predictive geopolitics —forecasting not only attacks but international escalations based on real-time sentiment and behavioural data.

4. Global Strategic Position

A WIA would:

- ❖ Balance powers between national intelligence agencies (CIA, MI6, FSB, RAW, MSS)
- ❖ Set **global security standards** and frameworks (like WIA Zero Trust Protocols)
- ❖ Operate across borders without being limited by traditional sovereignty (think: Interpol × Cyber Command × UN)

Insight: Its creation could trigger geopolitical shifts—nations may either see it as a **neutral protector** or a **threat to sovereignty**, depending on governance.

5. Risk & Ethical Considerations

- ❖ Data Sovereignty vs. Shared Intelligence
- ❖ AI Ethics in Surveillance
- ❖ Abuse of Predictive Power
- ❖ Transparency vs. National Security

Insight: A WIA must embed **ethical AI frameworks, multi-nation oversight, and zero backdoors** from inception to be globally acceptable.

Summary Visual (Suggested Chart Layout)

Pillar	Description
Mission	Global threat mitigation & intelligence unification
Technology	AI, blockchain, quantum encryption
Capabilities	SIGINT, HUMINT, OSINT, CYBINT
Challenges	Sovereignty, bias, surveillance ethics
Impact	Predictive geopolitics, neutralized threats

BUILDING THE NETWORK

Agency Formation & Strategic Positioning

- ❖ Establish WIA's legal and operational framework (Headquarters, governance, policies).
- ❖ Define mission, core values, and global intelligence strategy.
- ❖ Identify potential customers (governments, corporations, financial institutions, security firms).
- ❖ Develop an initial intelligence portfolio, including:
 - ❖ Cybersecurity & Threat Analysis
 - ❖ Economic & Political Intelligence
 - ❖ Counterintelligence & Security Solutions
 - ❖ AI-Driven Risk Assessment

Technology Partnerships & Capability Building

- ❖ Form alliances with top tech firms and defense contractors for AI, cyber defense, and data intelligence.
- ❖ Identify cutting-edge technologies (AI surveillance, blockchain security, deep learning analytics).
- ❖ Develop secure intelligence-sharing platforms for collaboration with global partners.

INNOVATION LEADERSHIP

Global Intelligence Partnerships & Regulatory Compliance

- ❖ Forge alliances with NATO, UN, and global intelligence agencies.
- ❖ Implement international cybersecurity and counterintelligence frameworks.
- ❖ Comply with global data security and privacy laws (GDPR, CCPA, etc.)

Enhancing AI-Driven Intelligence & Surveillance

- ❖ Deploy autonomous AI-powered surveillance systems.
- ❖ Develop advanced cyber-defense systems to protect WIA and its customers.
- ❖ Expand deep learning models for geopolitical risk forecasting

Expanding Revenue Streams

- ❖ Monetize intelligence consulting services for corporations and governments.
- ❖ Expand into financial intelligence (fraud detection, economic risk assessments).
- ❖ Launch exclusive intelligence briefings for private investors and high-net-worth individuals (HNWIs).

INDUSTRY DOMINATION & INTELLIGENCE EXCELLENCE

1 Establishing WIA as a Global Intelligence Leader

- ❖ Position WIA as the world's top private intelligence agency.
- ❖ Gain exclusive contracts with governments, intergovernmental organizations, and Fortune 500 companies.
- ❖ Expand into economic intelligence and political risk advisory.

2 Technological Breakthroughs & R&D Investments

- ❖ Launch next-gen AI-driven intelligence platforms.
- ❖ Invest in quantum computing for encrypted intelligence processing.
- ❖ Expand predictive analytics capabilities for global security threats.

3 Investor Returns & Financial Stability

- ❖ Break-even achieved with sustainable revenue streams.
- ❖ Explore mergers & acquisitions with cybersecurity and AI firms.
- ❖ Return early investor capital with high ROI and launch Series B funding for next-gen intelligence tech.

WIA will be, BY 2030:

- ❖ A globally recognized intelligence powerhouse with cutting-edge AI & cybersecurity solutions.
- ❖ A key player in global security & intelligence-sharing frameworks.
- ❖ Financially independent, with diversified revenue streams.
- ❖ A trusted intelligence partner for governments, private sector, and international organizations.

This roadmap ensures WIA's long-term success, customer focus, and global intelligence leadership. Let me know if you'd like to refine or emphasize any area!

- g) Intellectual Property Exchange: The Parties intend to explore and facilitate the exchange of relevant intellectual property, strategic roadmaps, and business plans for the successful execution of the Project. The ownership and licensing of Intellectual Property within the JV Company will be detailed in definitive agreements.

3. NEXT STEPS AND DEFINITIVE AGREEMENTS

- a) The Parties intend to continue discussions and perform necessary due diligence to finalize the terms and conditions for the Project.
- b) This MOU contemplates the future negotiation and execution of more definitive and legally binding agreements, including, but not limited to, a detailed Joint Venture Agreement, a Shareholders' Agreement, and any other commercial, operational, or licensing agreements as may be required.
- c) The Parties then intend to form a Joint Venture (JV) Company in India, which is subject to the approval of the respective Regulatory Authority, as the primary vehicle for undertaking the Project.

4. CONFIDENTIALITY

All non-public information shared between the Parties in relation to this MOU and the Project shall be kept strictly confidential and shall not be disclosed to any third party without prior written consent, except as required by Applicable Laws. This Clause 4 shall be legally binding upon the Parties.

5. REPRESENTATIONS AND WARRANTIES

Mutual Representations and Warranties: Each Party hereby represents and warrants to the other Party as of the Effective Date and, where applicable, on an ongoing basis during the term of this MOU, that:

- a) Due Organization: It is duly organized, validly existing, and in good standing under the laws of its jurisdiction of incorporation/formation.
- b) Authority: It has the full corporate power and authority to enter into and perform its obligations under this MOU. Each Party shall provide documentary evidence of the authority of its signatory within 30 business days of signing of this MOU
- c) No Conflicts: The execution, delivery, and performance of this MOU will not (a) violate any provision of its organizational documents; (b) violate any Applicable Law or any order, judgment, or decree of any Governmental Authority to which it is subject; or (c) conflict with, result in a breach of, or constitute a default under any material agreement or instrument to which it is a party or by which its assets are bound.
- d) Authorization: All necessary corporate or other organizational actions have been duly taken to authorize the execution, delivery, and performance of this MOU.
- e) Enforceability: This MOU constitutes its legal, valid, and binding obligation, enforceable against it in accordance with its terms, subject to bankruptcy, insolvency, reorganization, moratorium, and other similar laws affecting creditors' rights generally and to general principles of equity.

- f) No Litigation: There are no legal actions, suits, arbitrations, governmental investigations, or claims pending or, to its knowledge, threatened against it that would materially impair its ability to perform its obligations under this Agreement or the Project.
- g) Specific Representation by Swiss Capital Group: Swiss Capital Group specifically represents and warrants that it possesses the financial capacity and strategic resources necessary to fulfil its capital contribution and primary funding commitments as outlined in Clause 2(c) and 2(e).

6. INTELLECTUAL PROPERTY

- a) Existing IP: All Intellectual Property owned by a Party prior to the Effective Date of this MOU shall remain the sole and exclusive property of that Party.
- b) Developed IP: All Intellectual Property (including, without limitation, software, algorithms, and methodologies) conceived, developed, reduced to practice, or acquired by the JV Company or jointly by the Parties in the course of the Project or related to the business of the JV Company during the term of this MOU shall be the sole and exclusive property of the JV Company. Each Party shall ensure that its respective employees, contractors, and Affiliates involved in the Project execute all necessary assignments and other instruments to vest full ownership of such Intellectual Property in the JV Company.
- c) Licensing:
 - (i) To the extent any Party's existing Intellectual Property is incorporated into, utilized by, or otherwise necessary for the JV Company to carry out the Project, that Party shall grant the JV Company a non-exclusive, royalty-free, worldwide, transferable, sub-licensable license to use such Intellectual Property solely for the purpose of the Project for the term of this MOU.
 - (ii) The Parties shall ensure that appropriate separate agreements are executed between themselves and the JV Company to formalize such licenses, detailing the scope of use, limitations, and any other relevant terms. In case of any material existing Intellectual Property contributed by LaxmanDeep, Swiss Capital Group agrees to provide reasonable financial and legal support for its protection and defense against infringement during the term of this MOU.

7. GOVERNING LAW AND DISPUTE RESOLUTION

- a) Governing Law: This MOU shall be governed by and construed in accordance with the laws of the India.
- b) Amicable Settlement: The Parties agree to use their best efforts to resolve any dispute, controversy, or claim arising out of or relating to this MOU, or the breach, termination, or invalidity thereof, through good faith amicable negotiations.

- c) Arbitration: If any dispute is not resolved amicably within [e.g., thirty (30)] days of one Party giving written notice of a dispute to the other, such dispute shall be referred to and finally resolved by arbitration as per the Indian Arbitration and Conciliation Act 1996.

8. MISCELLANEOUS

- a) Entire Agreement: This MOU, including its Schedules and Annexures, if any, constitutes the entire agreement between the Parties with respect to the subject matter hereof and supersedes all prior discussions, negotiations, and agreements, whether written or oral.
- b) Amendments: No amendment, modification, or waiver of any provision of this MOU shall be effective unless made in writing and signed by duly authorized representatives of both Parties.
- c) Notices: All notices, requests, demands, and other communications required or permitted under this MOU shall be in writing and shall be deemed to have been duly given when: (a) delivered personally; (b) sent by nationally recognized overnight courier service (with tracking and proof of delivery); or (c) sent by email with confirmation of receipt (read receipt not sufficient), to the addresses specified below, or such other addresses as a Party may designate by written notice to the other.

If to LaxmanDeep: LaxmanDeep Financial Services Private Limited, D No: 1/18 D. Gollapalli, Vontimitta, Kadapa, Andhra Pradesh, India, 516213, Attention: Lakshumaiah Nanubala, Chairman & CEO, Email: laxman143ac@gmail.com

If to Swiss Capital Group: SWISS CAPITAL GROUP, 2 Route de Suisse, 1296, 8001 Coppet, Switzerland.

Attention: HRH Datu Grand Prince of Orients Dr. Gary SUM, Founder & Chairman, Email: gary.sum@swisscapitalasia.com

- d) Assignment: Neither Party shall assign or transfer its rights or obligations under this MOU, in whole or in part, without the prior written consent of the other Party. Notwithstanding the foregoing, either Party may assign this MOU to an Affiliate or to a successor in interest in connection with a merger, acquisition, or sale of all or substantially all of its assets, provided that such assignee agrees in writing to be bound by the terms of this MOU.
- e) Severability: If any provision of this MOU is held to be invalid, illegal, or unenforceable in any jurisdiction, such invalidity, illegality, or unenforceability shall not affect the validity, legality, or enforceability of the remaining provisions of this MOU in that jurisdiction or the validity, legality, or enforceability of such provision in any other jurisdiction. The

Parties shall endeavor to replace the invalid, illegal, or unenforceable provision with a valid, legal, and enforceable provision that achieves, to the extent possible, the original intent and economic effect of the invalid, illegal, or unenforceable provision.

- f) Waiver: No waiver by any Party of any of the provisions of this MOU shall be effective unless explicitly set forth in writing and signed by the Party so waiving. No waiver by any Party shall operate or be construed as a waiver in respect of any failure, breach, or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver.
- g) Counterparts: This MOU may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Facsimile or electronic signatures (e.g., PDF) shall be considered valid and binding.
- h) Headings: The headings in this MOU are for convenience of reference only and shall not affect in any way the meaning or interpretation of this MOU.
- (i) Cumulative Remedies: All rights and remedies of the Parties under this MOU are cumulative and are in addition to, and not in lieu of, any other rights and remedies available at law or in equity.

9. EFFECTIVENESS

This MOU shall become effective on the date first written above and shall remain in effect until superseded by definitive agreements or terminated by either Party upon thirty (30) days' written notice to the other Party.

10. NON-BINDING NATURE

This MOU is intended to set forth the Parties' mutual understanding and intent. **Except for Clause 4 (Confidentiality), Clause 5 (Representations & Warranties), Clause 7 (Governing Law and Dispute Resolution) and Clause 8 (Miscellaneous), this MOU is not intended to create, and shall not be construed as creating, any legally binding obligations or rights upon either Party.** No Party shall be liable to the other for any damages or losses arising from the failure to proceed with the Project or to enter into definitive agreements contemplated herein.

IN WITNESS WHEREOF, the Parties hereto have executed this Memorandum of Understanding as of the date first above written.
