CONFIDENTIAL INFORMATION FOR YOUR EYES ONLY AND WDBC TEAM

Laksuhumaiah Nanubala
Director dBank (WDBC) SW Development Laboratory – Bangalore, India

Re: Going Forward

Dear Laksuhmaiah,

Thank you for your communication with Chris Vincent, WDBC Chief People Officer and Sreedhar Tamarapu, WDBC Senior Vice President, Business Development UAE/India. They have confirmed to me that you understand the value proposition concerning the development of dBank Lab in India. Funds acquired are necessary for our relationship and the formation of the SW Development Lab. Therefore a few considerations that needs to be discussed and mandated... the following is presented for clarity and continuity of WDBC formulating the necessary premiere FINTECH development team in the World.

1. Identify FUNDING for the formation of the Laboratory. Within the next four business days, report to me regarding the maximum funding you can acquire and timeline. Identify the funding source and contact information. Do not discuss the WDBC project as it is Confidential. I will validate the funding source and place an NDA/NCA in place for discussion concerning the investment and ROI for the funds with the potential provider.
2. Be aware that all funds will be transferred to the WDBC bank account in US for disbursement to the team in India. Further, be advised that funds will be used for payroll, lease of spaces, computers, security, and other overhead. SW developers will be part of dBank India and the Laboratory team, they will not be considered outside augmented labor. Incentive pay will be available based on meeting milestones.
3. Be advised that I and Chris will be part of the Laboratory team and will in place in Bangalore. We project our first release Beta to take 6-7 Months with the right development team.
4. We have concise SW language identified for the front and back end. The most crucial aspect of the build is the banking ledger, we are targeting the Oracle ledger for various reasons, most blatantly the teaming of WDBC and Oracle Worldwide Corporation here in the US.
5. Once funds are acquired and transferred, we will be able to provide the technical aspects of the build. Chris and I will make arrangements to arrive in Bangalore within two weeks of receipt of funds.
6. You may look for secure space in the financial district of Bangalore for our working spaces. We will discuss the budget also once funding is acquired. Budget and capability is directly proportional to the amount of funding acquired. Let us know the soonest what is reasonable maximum funding you can acquire.
7. WDBC is valued at \$1bn USD pre-revenue. This is a low figure considering the scaled aspect of the company/project.

8. SW development will be continuous from the baseline build. We are building a platform for 180 countries, all different. Tweaks and considerations will be ongoing. Or offering a SW developer a position in our prestigious company should be considered a WIN for an individual.
9. This is a SERIOUS endeavor that will change the face of world finance and global financial stability.
10. Full transparency is crucial for our success and TRUST is a MUST.

Look forward to your immediate and thoughtful response, thank you.

Best and Let's Begin!

Gregory Ingles, Chairman and CEO
