

## Why **Tirubaa Goldmine** is Critical for North-East India

| Key Challenge in North-East | Ground Reality & Tirubaa Relevance                                                                                                             |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| Connectivity Gaps           | 8 NE states with hilly terrain   Rural internet penetration often below 50%   Online video learning unreliable → Offline education essential   |
| Power Availability          | Many villages receive <12–16 hours/day electricity   Frequent outages in Arunachal, Nagaland, Manipur, Mizoram → Solar-powered solution needed |
| Language Diversity          | 220+ spoken languages & dialects   Digital content mostly in English/Hindi → Local-language content creation & preservation required           |
| Teacher Shortage            | Multi-grade classrooms with 1–2 teachers   Shortage of Science & Math teachers → Digital Teacher ensures continuity                            |
| Youth & Skill Gap           | Limited skill access   High migration for jobs   NEP 2020 & Skill India focus → Offline skill delivery critical                                |
