Values in USD M. Method: $\text{value} = \text{capital} \times (1 + r)^{(N - \text{start year} + 1)}$, where N is the valuation year and returns compound from the start year, on full invested capital. Start year = the year after each investment’s final planned deployment (Y4; WIBIO Card Y5). Totals use unrounded values and may differ from rounded rows by 0.1.

Treasury & Governance

Suggested allocation. Strategic capital (USD 91M) plus treasury (USD 28M) = USD 119M.

MILESTONE-BASED GOVERNANCE

GREEN = Continue
Milestones met — next tranche released.

AMBER = Review
Milestone at risk — tranche held pending review.

RED = Stop / Restructure / Exit
Milestone failed — halt funding, restructure or exit.

Each tranche is released against pre-agreed milestones; status reported to the Swiss investment arm.
